CONTENT

Part 1: Solar Active Day

- **State of the art of BIPV technologies 7**
  Isabel Cerón, Dept. of Construction and Architectural Technology,
  Universidad Politécnica de Madrid, Spain

- **Getting the most from BIPV: Lessons from the last decade 13**
  Mario Micali, SolarCentury Italy

- **Energy and Architecture at the Centre of Energy Technology Dresden 19**
  Karin Rühling, Institute of Power Engineering, Technische Universität Dresden

- **Steel façade systems for BIPV applications - Advantages and application examples .. 25**
  Birgit Vach, RP Technik Profilsysteme, Bönen; Germany
  Jürgen Koch, KOCH Architekten / 4green architecture, Düsseldorf, Germany

- **Integrating organic photovoltaics into the building envelope..... 31**
  Billie Faircloth, Research Director, KieranTimberlake, Philadelphia, USA

- **The new shape of Solar 43**
  Clemens Jargon, VP Solyndra Inc

- **New multifunctional façade components for the building skin 49**
  Tilmann Kuhn, Fraunhofer Institute for Solar Energy Systems, Germany

- **Green technology for buildings 55**
  Marco Lang, Schüco International KG, Germany

- **Temperature and module efficiency:..... 61**
  Thermal and electrical behavior of various BIPV systems
  Kim Nagel, University of Applied Sciences of Southern Switzerland

- **Refurbishing flat roofs with PV to save heating and cooling costs 67**
  Martyn Johnson, Sunpower, Europe

- **Intelligent technology for long lasting watertight solar flat roofs 73**
  Klaus Burger, ILD Germany

- **Concepts for the integration of solar technologies in historical buildings 77**
  Isa Zanetti, University of Applied Sciences of Southern Switzerland

- **Architectural quality and environmental efficiency in revamping small historical town centres** 85
  Antonio Basti, Università di Pescara, Italy
- **Refurbishment of existing buildings and integration of solar energy** 91
  Laura Elisabetta Malighetti, Dept. Best, Politecnico di Milano, Italy

Part 2: Solar Passive Day

- **Intelligent kinetic skins for a sustainable architecture** 99
  David Rockwood, Associate Professor, School of Architecture, University of Hawaii
- **Adaptive architectural envelopes** 105
  Isak Worre Foged, Institute of Architecture, Aalborg University, Denmark
- **Light responsive envelopes** 113
  Mario Cristiano, Dept. of Urban Planning, University of Naples, Italy
- **Energy efficient daylighting - chances and risks** 119
  Wilfried Pohl, Bartenbach LichtLabor, Austria
- **Adjustable and extensible lamella for permanent solar shading systems** 125
  Alessandro Dama, Energy Dept., Politecnico di Milano, Italy
- **Analysis of passive solar systems of Norman Foster's EDF Building, Bordeaux** ... 131
  Marina Vidaurre-Arbizu, Dept. of Construction Science, School of Architecture, University of Navarra, Spain
- **Interplay Climate-Man-Building-Energy: Planning the design of office buildings in different climate zones** 137
  Petra Liedl, Dept. of Building Climatology and Building Physics, Technische Universität Munich, Germany

Part 3: Poster Session 141
